

"Facilitating Green America, One Community at a time"

SPONSORSHIP OPPORTUNITY – Be a Steward

GreenNEPA Recovery Act 2009 Seminar

Position your community to get its fair share of the Recovery Funds.

Subject: How to Position and Prepare for funding from the *Recovery and Investment Act of 2009* – incorporating mandated green requirements in the Public and Private sectors

Seminar Partners

May 7, 2009

Marywood University

Swartz Center

Conference Room A, Scranton, PA 18509

Be a Leader, Become a Sponsor

Seminar Focus

The seminar highlights the projected guidelines and funding flow, targeted entities and how they can use of funds, timelines and deadlines on funding, “Green Standards and Guidelines incorporated into the Bill” and the private sectors opportunities and resources available in the Bill. The proposed legislation is loaded with incentives and financing vehicles that could act as a catalyst to move the country toward a more sustainable and energy efficient future for both the public and private sectors.

*NSP (Neighborhood Stabilization Program)		*Tax credit leveraging	Service Providers
*Energy Program Financing			

About the Foundation

The Community Greenhouse Foundation is a not for profit organization that promotes and facilitates greener communities. We build bridges and unite communities through awareness, education and partnering.

Education, Planning, Action, Empowerment

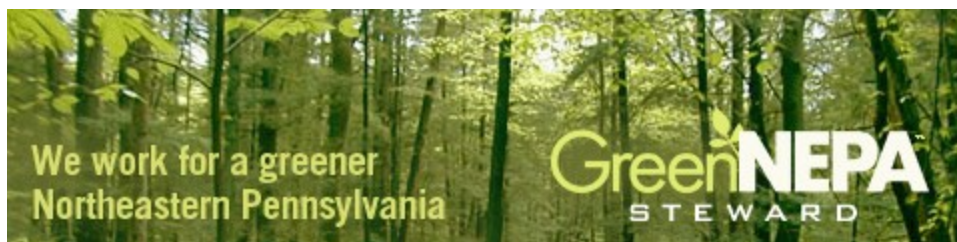

The Community Greenhouse Foundation was established in 1995 as the Industry Education Alliance in a partnership with the National Home Builders Association. In 2002, the importance of Green Sustainable Development for the future of America was identified as a priority. Under the direction of Richard W. Evans, CEO/Chairman the IEA has been transformed and prepared to fulfill the mission of the Community Greenhouse Foundation. The foundation has several primary areas of focus.

First, we seek to increase awareness of sustainable building, energy efficient design, sustainable development and renewable practices amongst a broad constituency.

The second goal of the foundation is to partner with organizations, manufacturers, and accredited professionals and firms from all disciplines, creating a forum to encourage best practices, new technologies and connect communities with people and resources.

And third, we work to facilitate, lead, and promote vehicles that will empower communities to be greener, cleaner and more sustainable.

The foundation's mission is “Facilitating green America, one Community at a time.”

“Facilitating Green America, One Community at a time”

Join and be seen as leaders from across Northeastern Pennsylvania to prepare and exchange ideas to develop Sustainable Green projects and programs available through the Recovery and Investment Act 2009.
